

## Suggestions

**Directions:** Measure and mix the required amounts of Ecowalla and water together. Each task is different, so start with a basic dilution from the table above and then adjust ratio according to your particular needs. Ecowalla can be applied using a Sprayer or other watering device. After applying, allow time for the enzymatic action to develop. Repeat application if necessary. Always test first in an inconspicuous place.

**Garden / Indoor Plants:** Dilute 15 ml. concentrate per litre of water. Lightly mist individual plant leaves using a Spray Bottle, or use a Hose Sprayer at a mixing ratio of 30 ml concentrate per 3.7 litres of water when covering large areas such as organic gardens, orchards, farm crops.

**Carpet Shampoo:** Dilute 30 ml concentrate per 3.7 litres of warm or hot water when using wet vacs, carpet cleaners and steamers. Remember to first dry vacuum carpets before beginning shampoo cleaning, and to allow time for the cleaner's enzymatic action to work. For deeper cleaning, add a ½ to 1 cup of borax per 3.7 litres to produce better results. For stubborn stains, use 15 ml. concentrate per 1 litre of hot water and allow to stand 30 min. before blotting dry. *Always test first for color fastness in an inconspicuous area of the carpeting or fabric.*

**Stain & Odour Removal:** Dilute 15 ml. concentrate per 1 litre of water. Apply to furniture, drapery, or carpeting using a Spray Bottle or towel. Allow time for enzymatic action to work. Then rinse and blot dry with a rag. For stubborn stains or odors, try using a stronger dilution of concentrate and allow to soak overnight. *Always test first for color fastness in an inconspicuous area of the garment or upholstery.*

**Pet Stains and Odours:** Dilute 30 ml concentrate per 3.7 litres of warm or hot water to remove animal stains and odors from carpeting and furniture using steamers, sprayers or towels.

**Laundry Machine:** Brighten and freshen your laundry without the use of harsh bleach. Add 30 ml to 60 ml. of concentrate to a load before adding clothes.

**Kennels/Stables/Pens:** For deodorizing stables, kennels and trailers, use a garden hose and Hose Sprayer attachment at a mixing ratio of 60 ml. concentrate per 3.7 litres water or stronger.

**Drains/Grease Traps:** Pour 30 ml to 60 ml. concentrate down drain, allow to stand 30 minutes, then flush with boiling water.

**Glass/Mirror:** Dilute 15 ml. concentrate per 1 litre of water. Use a Spray Bottle. If streaking occurs, dilute the solution with additional water.

**Toilet Bowl:** Apply 30 ml concentrate to toilet bowl and let stand for 30 minutes before brushing and flushing with hot water.
